In G.O. No 9731 2 of the 10.12.1902 the above arrangement was ordered to be continued till the end of June 1903 (Ch. 10392)

Again in G.O. No 6253-4 of the 23.6.03 it was ordered that (Rel (319 a.) - 2) the Control and the management of the water works in question may continue to rest in the hands of the Municipal authorities for a further period of 3 years from the 1st July 1903, as recommended by the Chief Engineer who says that he hopes to formulate definite proposals as regards the Control of the water works when submitting the projects of the Devaru and Veyaundr Channels. Submitted 31/3/1906 This may, if approved be referred to the Chief Engineer (unofficially) for favoured opinion.

Returned to the Secy to Govt Pub & Rev Depts with a precis of correspondence relating to the Central & the Vannikkan Water works

My opinion is, that the plant & all works in connection with the Water-Supply & distribution are rapidly deteriorating, & that if reasonable, I might say necessary, that the whole of the works be taken over by & managed under the sole control of the Pw Department

To maintain the works & Distribution System in anything approaching a satisfactory way the cost would be about Rs 12,000/- annually & in addition to this there should be a sinking fund of 5000/- Rs annually for renewals & replacements It is for Govt to decide whether the Municipality

These figures are taken from Mr Kumaraswamy Iyengar's estimate of cost. Switch I agree Walsh

Can afford to pay this sum (Rs 17,000) which is necessary for its proper management

In regard to the question asked by the 1st Councillor in respect to the projects for improving the Devassy & Vipanadi Channels, the project for improving the Devassy Channel has already been sanctioned by Govt, & the work has been started But I may here say that in respect to the supply in this Channel being improved thereby, it will certainly improve matters so far as irrigation under the Channel & the Water Supply to Mysore during 9 or 10 months of the year but as to improving the water supply to the City of Mysore during the dry weather, this would not be effected very materially: there may be some little improvement in this respect when the two new aqueducts are built in the 1st & 5th miles & the present leakage at the old works at these points stopped, but there is not sufficient water available in the rivers to work the turbines during the periods (in each month when in which) a hot weather supply has to be let down the Chickdevarajaga Channel,

MGCPB—20,000—I 11-04

Serial No

and no remedy can possibly be applied to prevent this unless (1) the hot weather supply to the Chickdeencagan Channel and perhaps some channels above also is stopped, or (2) until we have carried out the Electrical pumping Scheme & take the place of the turbines

The project for the Vizagapatam Channel improvement has just been received from the Supdg Engineer, & will be forwarded to Government before long for orders. But this work does not in any way affect the water-Supply to Negapatam City -

Precis of correspondence relating to the maintenance and control of the works connected with the water supply to Mysore City from the Devaroy Channel at Belagola.

--- ---&&&&&&&&&&&&--------

The Mysore water works were opened out in April 1896 and the manage -ment was partly under the P.W.D. and partly under the Municipality, that is the Pumping Station and Head works &c were under the former and the distribu- -tion under the latter This divided control was not considered to have work -ed satisfactorily, and the entire general management was transferred to the Municipality from 1st July 1901, in Government Order No.1654-7/L.F.103-92 dated 29th July 1901, the proposals be- -ing as follows -

H & P

Flag A

(1) That the whole length of the Devaroy channel be handed over to the Deputy Commissioner, Mysore District, for maintenance, and that he also have com- -plete control of the head sluice and the supply of water to the turbine and for cultivation under this channel, the usual annual allotment for the channel being handed over to the Deputy Com- -missioner for maintenance. Any special repairs, or improvements which could

not

not be met from the year's maintenance allotment,would be referred to the Superintending Engineer,Western circle, for orders,who would then make arrange--ments,for carrying them out after proper investigation.

(2) That the whole of the turbine house establishment be handed over to the President,of the Mysore Municipality under whose orders they will work.But questions involving changes in the establishment,or any matter concerning the Machinery be referred to the Chief Engineer for orders.

(3) That the whole of the other works in connection with the water supply to Mysore City,the rising main, and the reservoirs at Ventikoppal(with existing establishments) be handed over to the control of the Municipal Presi--dent,who will for the time being refer all proposals in connection with alterations or additions to the exist--ing system,as well as any technical questions which may arise to the Superin--tending Engineer,Western Circle for opinion,before carrying them out.

(4) That Mr.Rang sawmy Iyengar Executive Engineer,Water Supply and Stores Division,be deputed to inspect and report on the machinary and the

plant

plant once a month.

Subsequently, the President having proposed that Mr. Rangasawmy Iyengar should be asked to inspect the reser--voirs at Vontikoppal and other works and plant connected with the Vanivilas Water Works, and to advise the Munici--pality on all technical matters, the proposal was accepted in Chief Engineer's No.2885 dated 21st May 1902, but the President was informed that this would in no way relieve the Municipality from their responsibility for the proper maintenance of the installation.

In Government Order No.9731-2/L.F

1902 Flag B 103-92 dated 10th December 1902 the above arrangement was ordered to be continued for another year i-e till the end of June 1903. Again in Government Order No.6253-4/Ml (319-04) -2 dated

Flag C 23-1-1905, it was ordered that the con-trol and management of the water works in question may continue to vest in the hands of the Municipal Authorities for a further period of 3 years from 1st July 1903, as recommended by the Chief Engineer who hoped to formulate defi--nite proposals as regards the control of the water works &c when submitting the projects of the Devaroy and Virja--nadi Channels

In his Inspection Note dated 2nd

Flag D. February 1903, Mr. Rangasawmy Iyengar

re-ortes

reported after going over the distribu-
-tion work that the water works could
not be properly managed by the Munici-
-pality as they had not a qualified
staff,and suggested that the whole
management be transferred to the P.W.D
Again in his Inspection Note dated 20th
Flag E. March 1903 Mr.Rangasawmy Iyengar brought
to notice the unsatisfactory manner in
which some of the works were being
managed,and this was communicated to
Government in the General and Revenue
Flag F. Secretariat in Chief Engineer's No.1917
dated 2-4-1903. In Inspection Note dated
P
2403
Flag G. 30th April 1903,Mr.Rangasawmy Iyengar
again reported that nothing had been
done to prevent leakage in the distri-
-bution system,and to carry out the
necessary repairs for the masonry works
of the foundation, and suggested ~~for that~~
the Municipality should make suitable
provision in their budget for proper
maintenance of the fountains &c. The
Dewan having approved of Mr.Rangasawmy
Iyengar's suggestions,they were com-
-municated to the Municipality for accept
-ance,in P.W.Secretary's No.40/210
Flag H. dated 23rd May 1903.

Mr.Rangasawmy Iyengar in his No.
Flag I. 160 dated 12th February 1904 to the
address of the Superintending Engineer,
Western Circle,reported,that in addition

to

the Municipality. Under the circumstances he suggested that the Whole water works including the Pumping Station, the Filters and the distribution in the City should be placed in charge of a qualified Engineer acting under the orders of the Chief Engineer. That all expenditure, &c should be controlled by the Chief Engineer, the municipality paying a fixed yearly contribution for "Working expenses and maintenance of "the water works" The Municipal Board were spending annually Rs.6,360 for the maintenance of the water works, which was totally inadequate for the purpose. No provision was made for the repairs &c of the fountains in the City. The Municipal Engineer who was supposed to inspect the work was either incapable, or had no time to do so. Under these circumstances the system adopted by the Municipal Board was quite unsuited for the maintenance of the water works. To remedy these the water works staff should be reorganized as suggested, and the management vested in the P.W D The total contribution required per annum amounted to Rs 12,000 as per note on margin. Besides this the Municipality should also contribute Rs 5,000 annually towards the formation of a sinking fund for replacing and removing such parts as are subjected to wear and tear If matters were allowed to go on in this state

state of disorder Government would have to spend a very large amount to put them in working order again.

Major A.J.de Lotbiniere.R.E., in forwarding the above report stated that Mr.Rangasawmy Iyengar's proposal to have the management of the water works vested in the P.W.D. and the staff re-organized on the lines suggested appeared to him the only satisfactory solution to adopt under the circumstances explained in the report-Vide Flag J. No.926 dated 24-2-1904. The Chief Engineer recorded the following note on the above communications -

" This is a question which has "been in my mind for some time The "state of the fountains in the City, "leaky pipes &c,is disgraceful.The one "point which I cannot see my way to get "over is the channel (Devaroy) It would "mean dual control again during irriga-"-tion season. Municipality again would "not give enough money.I will go into "the question with His Highness at Ooty "after I return from Bombay".

Mr.Rangasawmy Iyengar again reported Flag K. -ed in his Inspection Note dated 17-2-04 that there was no evidence of the Municipa-lity taking any interest in the working of the plant,and suggested that the Municipal Engineer be directed to

to regularly visit the place for inspect-ing the machinery once a week,and sub--mit a written report to the President, sending a copy of it at the same time to the Executive Engineer,Water supply and Stores Division. An extract from the Inspection Note was sent to the President for report,who in his No.478

Flag M dated 14-3-1904 replied that the points noticed were receiving attention.On this reply,the Chief Engineer recorded the following Note - "The question of "the proper maintenance of all water supplies Bangalore,Mysore,Nanjungud &c " requires a definite decision.There is "no doubt of the deterioration of these "works,and it is absolutely necessary " to place them under the P.W D. as "soon as the necessary details have been properly worked out".

Flag N In his Inspection Note dated 24-2-05 Mr.Rangasawmy Iyengar again brought to notice that the Municipality had not done much towards the improvement of fountains in the City, that they had not been sending weekly reports of the working of the turbines, and certain other drawbacks, and suggested that the Municipality be informed that what they are spending on the maintenance of the Pumping Station is miserably inadequate to its needs,and that they ought to be prepared to spend something more if

they

they do not want the machinery to break down. He also recommended that the staff and machinery together with the pipe line up to the commencement of the delivery channel be placed under the direct charge of the P.W.D. and that the Municipality should pay all the working expenses and contribute a fixed sum for the proper maintenance, repairs and renewals annually. The Chief Engi-neer thereupon ordered the preparation of an estimate for the above, and record-ed the opinion that in view of the proposed electrification of the plant at an early date, we had better wait for a short time before formulating pro-posals.

Memorandum to the Dewan of Mysore

Military

No. 185 one 4

Dated Bangalore 21st March 1906

Subject

Water Supply at Government House, Mysore

In continuation of my memo No. 186 dated 27th February 1906 (put up herewith) I submit for your information my letter to the President, Mysore Municipality and his reply thereto.

To see that water for the town is available in sufficient quantities is of course one of the most important duties of the Municipality

I recollect that when the water was in charge of the P.W.D there was not all this trouble or shortage possibly it would be well to re-transfer the charge to the more expert hands of the P.W.D

Init./ P.N.K
22 III 06

Memorandum to the Dewan of Mysore

Military

No 166
Envt 1

Dated Bangalore 24th February 1906

Subject
Water Supply to the Govt House at Mysore.

I pointed out to the President, Mysore Municipality, that the supply of water to Government House was irregular He suggested that a cistern sufficiently large to hold my daily requirements should be constructed This was done

However even during the Prince of Wales' visit I was not able to get enough water to fill the cistern Not only did the garden suffer from want of water but even the horses at Government House had to be taken to Wellington Lodge to be watered If this State of things is to be permitted to continue it will be impossible to maintain a decent garden at Government House or to water the crotons and other plants supplied by Mr Cameron to improve the appearance of the place the Highness' guests will also be put to great inconvenience when staying at Mysore

I would request therefore that Headquarters concerned may be addressed on this extremely urgent matter

I should note that the supply of water to the filter during H.R.H's visit was quite satisfactory but has since ceased

G O No 6253 4 & the 23rd January 1905 approving of the Chief Engineer's action of the Chief Engineer of Mysore in allowing the management and control of the Vani Vilas water work to vest in the Revenue Department for a further period of three years from the 1st July 1903.

~~ORDER PASSED~~ No

2. Letter No 3225 dated the 29th March 1906 from the Military Assistant to the Govt of H. H. the Maharaja of Mysore bringing

over

SUBJECT

to notice the inadequate supply
of water to the Government
Monument Lenore
& Note of 3rd ult & April 1906
from the Chief Secretary to Govt
of the N.W.F. the Executive Engineer
on the P.W.D stating that the
plant and all works in connection
with the Water Supply and distribution
are rapidly deteriorating, that
it is desirable that the whole
of the Vane Khas water works
be taken over by, and subsidiary
under the sole control of, the
P.W.D, that to maintain the
works and distribution System
in anything approaching a satis
factory way, the cost would be
Rs 12,000/ annually, and in addi
tion to this, there should be
a sinking fund of Rs 5,000/ annually
for renewals and replacements
and that it is left to the Govt
to decide whether the Bannu City
